

# DECO-MAS

di Cito Alberto & C. s.n.c.

Dear customer,

We are glad to introduce you *CLEANOS 2000®*, the innovative machine specifically created for internal cleaning of ceramic silos.

The enormous richness and the advantage of this machine are mainly to save water, that as everybody knows, is an inestimable and unfortunately not renewable resource.

With *CLEANOS 2000®* a drop of water will be not necessary to use and furthermore, your staff will get no risks during the cleaning of silos because the presence of men inside, is not requested.

So: 100% Safe and Saving money.

What *CLEANOS 2000®* can do:

### **-SOME TECHNICAL DATA:**

It works on silos up to 5 meters diameter.

The access hole\*\* dimension have to be :

On silos from 1.500 to 3.000 mm: 200 x 500 mm

On silos from 3.000 to 5.000 mm: 400 x 1.000 mm

\*\*the silos access hole has to be always on the same axle of silos.

It works on silos maximum Height: 18 meters\*\*

\*\*for silos more higher than the standard, some technical modifications will be necessary. They will be considered NOT included in the supply and will be analyzed separately.

### **MACHINE DIMENSIONS (MAX.)**

Height: 1.600 mm

Length: 2.300 mm

Depth: 600 mm

There are 2 kinds of machines:

- 1) *CLEANOS 2000®*: arm L=1.000 mm
- 2) *CLEANOS 2000®*: arm L=3.000 mm

Both of this versions are supplied with a pneumatic engine.
